EECS 581: Software Engineering II

Team Meeting Log

Complete one log for every team meeting, including meetings you hold on your own outside the weekly standup. Store completed logs in teams GitHub repository.

Team #	23
Date	10/1/2026
Time (start – end)	4 - 5pm
Location	Eaton 3001
Meeting objective	Go over changes, next steps for project 2

Attendance

List every team member. Mark present or absent, and note the reason for any absence.

#	Team member	Present	Absent	Reason if absent
1	Isaac Miller	X		
2	Alexander Toles	X		
3	Jaiden Watts	X		
4	Weller Jude	X		
5	Courtney McCray	X		
6	Bryant H Goseland	X		
7	Joshua L Pearson	X		
8	Sam R Prestigiacomo	X		

1. Task Completion Confirmation

What each member committed to at the last meeting, and where it stands now. Use: Completed / In progress / Not started.

Team member	Task assigned last meeting	Status
Issac Miller	AI System, AI hard mode	In progress
Alexander Toles	AI System basic functionality, AI easy mode	In progress
Jaiden Watts	AI system,AI medium mode	In progress
Jude Weller	High score, stat tracking	In progress
Courtney McCray	Adding visual customization	In progress
Bryant H Goseland	Verifying game functionality, testing	In progress
Joshua L Pearson	Creating hint system	In progress
Sam R Prestigiacomo	Adding sound effect to game actions	In progress

2. Discussion Summary and Decisions Made

What the team discussed and what you decided. Record decisions clearly enough that an absent teammate could catch up from this alone.

The team discussed the progress of our improvements and changes. We talked about how we wanted to implement the AI solver. We talked about what statistics we wanted to add to the statistics page of the game.

3. Roadblocks and Impediments

Anything slowing the team down — technical problems, unclear requirements, dependencies, scheduling. Note who is affected and what the team plans to do about it.

There were dependency issues with adding the sound effects, and the readme was updated to make the requirements clearer.

4. Tasks Allocated for Next Meeting

Every task needs a named owner and a due date. "The team will work on the UI" is not a task.

Owner	Task	Due date	Est. hours
Sam	Improving sound effects, fixing dependencies	10/08/26	1-2
Issac	Finishing hard AI solver.	10/08/26	2
Alex	Updating documentation	10/08/26	1-2
Bryant	Creating test cases, bug fixing	10/08/26	1-2
Josh	Bug fixing	10/08/26	1-2
Jude	Visual cleanup, adding statistics section	10/08/26	2
Jaiden	Finishing medium AI solver.	10/08/26	1-2
Courtney	Updating menus and visual improvements.	10/08/26	1-2

5. Person-Hours Logged This Week

Required for the project documentation grade. Record actual hours spent on coding, testing, meetings, and documentation — excluding EECS 581 lectures. Keep this current every week; it cannot be reconstructed accurately at the end of the sprint.

Team member	Work performed (day by day)	Hours
sam	Sept. 29: Added sound effects to game actions.	2-3
jude	Sept. 29: Added stats menu	3
jaiden	Sept. 28: Created outline for medium AI solver	1
josh	Sept. 27: Added hints system	3
Issac	Sept. 29: Created outline for hard AI solver	2
Bryant	Sept. 27: Bug fixing	1
Alexander	Sept. 29: Created easy guess function	1
Courtney	Sept. 27: Added sidebar with light/dark mode options. Sept. 28: Updated UI	3
	Team total this week	16
