EECS 581: Software Engineering II

Team Meeting Log

Complete one log for every team meeting, including meetings you hold on your own outside the weekly standup. Store completed logs in teams GitHub repository.

Team #	23
Date	10/8/2026
Time (start – end)	4 - 5pm
Location	Eaton 3001
Meeting objective	Discuss what needs to still be finished.

Attendance

List every team member. Mark present or absent, and note the reason for any absence.

#	Team member	Present	Absent	Reason if absent
1	Isaac Miller	X		
2	Alexander Toles	X		
3	Jaiden Watts	X		
4	Weller Jude	X		
5	Courtney McCray	X		
6	Bryant H Goseland	X		
7	Joshua L Pearson	X		
8	Sam R Prestigiacomo	X		

1. Task Completion Confirmation

What each member committed to at the last meeting, and where it stands now. Use: Completed / In progress / Not started.

Team member	Task assigned last meeting	Status
Issac Miller	Finishing hard AI solver.	In progress
Alexander Toles	Updating documentation	In progress
Jaiden Watts	Finishing medium AI solver.	In progress
Jude Weller	Visual cleanup, adding statistics section	In progress
Courtney McCray	Updating menus and visual improvements.	In progress
Bryant H Goseland	Creating test cases, bug fixing	In progress
Joshua L Pearson	Bug fixing	In progress
Sam R Prestigiacomo	Improving sound effects, fixing dependencies	In progress

2. Discussion Summary and Decisions Made

What the team discussed and what you decided. Record decisions clearly enough that an absent teammate could catch up from this alone.

The team went over what final things needed to be completed for the project. The majority of the work left is just general bug fixing and polishing the UI. The team also went over the expectations and possible ideas for project 3.

3. Roadblocks and Impediments

Anything slowing the team down — technical problems, unclear requirements, dependencies, scheduling. Note who is affected and what the team plans to do about it.

The biggest roadblocks the team has faced were related to time management as it has been a busy week for everyone.

4. Tasks Allocated for Next Meeting

Every task needs a named owner and a due date. "The team will work on the UI" is not a task.

Owner	Task	Due date	Est. hours
Sam	General bug fixing, helping with stats	10/11/26	1-3
Issac	Hard AI solver	10/11/26	2
Alex	Updating documentation	10/11/26	1
Bryant	Bug fixing and updating bug log	10/11/26	1-2
Josh	Bug fixes, adding feature	10/11/26	2-3
Jude	Improving stats page	10/11/26	1-2
Jaiden	Finishing Ai, general bug fixing	10/11/26	1
Courtney	Improving UI	10/11/26	1-2

5. Person-Hours Logged This Week

Required for the project documentation grade. Record actual hours spent on coding, testing, meetings, and documentation — excluding EECS 581 lectures. Keep this current every week; it cannot be reconstructed accurately at the end of the sprint.

Team member	Work performed (day by day)	Hours
sam	Oct. 6: Improved sound effects, and updated stats section	1-2
jude	Oct 6: Improved stats menu	2-3
jaiden	Oct. 6: Medium AI solver	1
josh	Oct. 8: Going over changes and documentation.	1
Issac	Oct. 5: Updated front end and AI implementation.	2
Bryant	Oct. 6: Bug fixes and testing	1
Alexander	Oct. 7: Updating logs and documentation	1
Courtney	Oct. 6: Updating stats window and AI	1
	Team total this week	10
